Wando, SC 29492

1/22/2008

To; the Public Service Commission of South Carolina,

Ref; Docket Number 2007-421-T

I Albert Kohler Owner/President of Kohler Moving & Storage Inc. do oppose the adoption of regulations instituting a maximum rate tariff.

If reasons need be submitted please accept the following;

1. This needs to be studied thoroughly before you "propose to adopt" without the movers that will be affected to have time to prepare themselves and they're business.
2. I have found no movers that support the instituting of this tariff, all seem to oppose, most oppose adamantly.
3. As a small company primarily providing service to my community I feel that my business is particularly vulnerable with this proposed tariff.
4. My main concern is that this will cap how much a full service law abiding mover can charge while giving movers that are barely/if legal with much less overhead the right and ability to cut prices and do harm to our industry. Legal movers must follow many state and federal regulations at great expense to us. We need more income not a way of getting less.
5. My question is who would this serve?

Please as always feel free to contact me with regard to this letter of opposition. Please also provide me with any information that you may have concerning this matter.

RECEIVED
